Introduction:

Thank you for purchasing this plugin and I hope you this will come in handy for your need. If you come across any issues please feel free to leave a comment on envato website and I will do my best to get back to you.

Follow us on twitter [@myeventon](#) - to get latest update notices and news about eventON.

Installation

Couple of ways to install the plugin.

1. download the zip file and in WordPress (WP) go to **Plugins> Add New > Upload** and select file and install plugin.
2. Unzip the content of the zip file to wp-content/plugins directory and then on WP back-end "**activate**" the plugin.

Once the plugin is activated

Go to **Plugins> Installed plugins** and you should be able to see "**myEventON**" plugin installed.

Important NOTE:

- When you install this plugin it will create a custom post type called Events with slug "**ajde_events**"
- Events created via this plugin uses a post slug of "events" and if you choose to place the event calendar in a page with a url like [www.ashanjay.com/events](#) - the calendar will not work. So please make a page with url like [www.ashanjay.com/events-directory](#) for the calendar plugin front-end to work on events achieve type pages.
- In order for the event calendar to properly work on front-end make sure to include `wp_header()` tag

Other Questions and comments

If you have any questions or concerns after purchase. Please send us a ticket via <http://helpdesk.ashanjay.com>

NOTE From Ashan Jay (Author)

I want to thank you very much for purchasing this plugin. This plugin was custom build from scratch with best code practices for better optimization.

Also if you have an ideas or thoughts to improve this plugin, I would love to hear your thoughts! Please send those to us as a feature request ticket via <http://helpdesk.ashanjay.com>

Enjoy!
